XM radio must be able to keep the weather and traffic stations. When traveling as much as we do today, every minute on the road is a minute taken away from doing other productive things. There is a 15 second blip on the regular radio about traffic and they do not allocate enough time to go over all areas of traffic. XM has the ability to give alternatives so that the accident scene or dangerous conditions can be avoided in a timely manner. Please keep the traffic and weather on XM.
